## **LIVE SECURITY**

WP Engine's Live Security teams and Enterprise Security Environment using state of the art technologies block over 150 Million attacks each month. In the rare instance of compromise, WP Engine's security guarantee means we take responsibility for cleaning it to give complete peace of mind.

## **PERFORMANCE**

WP Engine's Digital Experience Platform, with its proprietary EverCache® layer, Content Delivery Network backed by industry leading cloud platforms from Google Cloud and AWS, is specifically configured for bleeding edge performance. Tested over 12,000 sites which saw an average 38% performance boost.

## **24/7 WORDPRESS SUPPORT**

With over 200 WordPress support technicians, WP Engine is able to provide award-winning true 24/7/365 live WordPress specific support with an average response time under 2 minutes. 3x Winner of the Gold Stevie® award for best tech customer support in the world.

## AUTOMATED SSL CERTIFICATES

Google now prioritizes sites with SSL certificates enabled, and actively warns users of those that don't. WP Engine includes a simple to apply, free, and automatically renewed SSL Certificate from Let's Encrypt® using industry leading encryption to make sure your site is protected.

[Staging and Development environments on WP Engine.](#)

## 1-Click STAGING

Use WP Engine's automated 1-Click Staging environments to easily make changes to your site, and test them, safe in the knowledge that your live site will not be affected. If you make any mistakes, our Automated Backups ensure you'll be able to easily rollback the site, on demand.

## CONTENT PERFORMANCE DASH

Easily understand which content, posts, or products, and authors are performing most strongly on your site with our Content Performance Dashboard. Get the information you need to retarget your strategy with greater agility and make the most of your marketing efforts.
