

# STRATEGIC CYBER RESILIENCE

.....  
A QUICK GUIDE FOR  
**BUSINESS LEADERS**

**Security incidents are inevitable, but successful businesses prioritise being **CYBER RESILIENT** instead of scrambling to recover. Strategic cyber resilience involves several elements.**

## **PROACTIVE DEFENCE**

Neutralise threats before they can do any harm. Treat regular assessments, threat intelligence and strong policies as your first line of defence.

## **QUICK RESPONSE**

A well-structured incident response plan allows for quick detection and mitigation of risks. This ensures you are back to business in no time.

3

## **BUSINESS CONTINUITY**

.....

Don't leave room for cyber attacks to disrupt your operations. Implement a strategic business continuity plan that includes backup and disaster recovery steps as well.

## **STAYING AHEAD OF THE CURVE**

.....

Evolve with the threat landscape. Stay updated on the latest trends, learn from past incidents and continuously strengthen your defences.

4

## **SECURITY- CONSCIOUS CULTURE**

Train your employees to identify and manage risks. Foster a security-first culture.

## **COMPLIANCE**

Failing to meet regulatory requirements can attract hefty fines, lawsuits and damage to your brand's reputation.

**If a cyber incident struck today,  
would your operations continue  
uninterrupted?**

**WE CAN HELP** you build a security  
plan based on the core elements of  
strategic cyber resilience.
